

All ground and prep work to be completed by Kempley Sod Farm, including leveling and spreading of gravel and fines.

Kempley Farms has been family-owned and operated since 1857, and in 1963 we started growing sod. We pride ourselves on the attention to detail we put into our sod, which extends to how we grow it and when we cut it. Over the years we've learned how to grow our sod with the highest quality care, in turn creating a better end product for our users.
